

GAS PIPING

The installation of all gas piping shall comply with each IFGC and / or IFGS standard as set forth in accordance to the **International Fuel Gas Code 2018**.

No Permit application will be accepted without a riser diagram of the gas piping system. (The length of pipe from the point of delivery to the most remote outlet and all branch outlets.) Also include the total **BTU** rating of each appliance and indicate on the drawing **all pipe sizes**.

CSST Installations:

The following is required for permit applications whether the installation involves new install or extension of existing that includes CSST piping:

1. A copy of the installer's certification from the manufacturer for the installation of CSST.
2. An electrical permit is required for the bonding of CSST

Example:
